

# CodeLink<sup>®</sup>

*The New Last Step in Alignment Service*

**HUNTER**  
Engineering Company

# CodeLink<sup>®</sup> provides a simple, integrated solution

## Simple and affordable

- ✓ Automatically identifies candidate vehicles.
- ✓ Incorporates reset steps into the alignment.
- ✓ Uses aligner screen to display instructions.
- ✓ Comes standard with system – no extra costs for expensive diagnostic scan tools.
- ✓ Updates automatically with system software upgrades.
- ✓ Dedicated alignment tool.

*Simplified reset instructions replace confusing OEM procedures*

## Finishes the job right

- ✓ No other reset tool matches CodeLink's patented integration with the alignment procedure.
- ✓ Guarantees precision with exact steering system sensor thresholds.
- ✓ Reduces errors that result in customer comebacks.

*Printed documentation confirms that steering system reset was completed properly*

# CodeLink® – The new last step in alignment service

## The new last step...

CodeLink's patented integration "links" the vehicle OBD-II system to the aligner to measure SAS position and reset the sensor referenced to the vehicle's alignment geometry.

## CodeLink® advantages:

- ✓ Integrated with Hunter WinAlign® systems
- ✓ Simple instructions shown on aligner screen
- ✓ Only one tool required
- ✓ Wireless communication with aligner
- ✓ Resets SAS and other related sensors
- ✓ Alignment printouts document reset

# Over 25 million vehicles require Steering Angle Sensor<sup>†</sup> reset... and growing!

By 2012, all new vehicles will be manufactured with Electronic Stability Control. Many will require an SAS reset.

\*Steering Angle Sensor reset requirements vary based on model and year. Please see Hunter's Vehicle Suspension Adjustment Information (Form 1708-T) for detailed model and year coverage.  
<sup>†</sup> Although steering angle sensors are most common, CodeLink also resets other related sensors when required, such as the deceleration sensor, torque angle sensor, the yaw rate sensor, etc.

Many Hunter alignment systems are upgradable. CodeLink requires WinAlign software 11.0 or greater. See your Hunter sales or service representative for more information. Specifications, models and options are subject to change without notice.

For additional information on WinAlign and HawkEye Elite, see Form 6230-T.
